

LIFTS IN PUBLIC

PRODUCT GUIDE
FOR PUBLIC OR COMMERCIAL BUILDINGS

PUBLIC ACCESSIBILITY

lift solutions comply with European Safety & Accessibility Standards and are offered with a wide range of user-friendly options such as voice announcement, level indicators and remote call button stations.

COST-EFFICIENT CABIN LIFTS

When you buy a cabin lift from Cibes, you get a high-quality product with the same sense of luxury and comfort as a conventional lift, but at a fraction of the cost. Cibes Lift provides smart, modular cabin lifts, which are fast and easy to install without major construction work – the perfect choice for any building.

SMART LIFT CONCEPT

Cibes lift solutions will integrate seamlessly with any project, without the extensive preparations and building work associated with conventional lifts. Our lifts are delivered in ready-made modules and require a much lower pit and headroom than conventional lifts.

LIFTS MADE IN SWEDEN

- Timeless Scandinavian design
- Short manufacturing time
- Minimal refurbishment
- Fast and easy installation
- High-quality lift solutions

SAFE & USER-FRIENDLY

Our lifts are safe and easy to use, even for small children. To make sure that our lifts are always installed and maintained correctly, we only allow our own subsidiaries and certified dealers to sell and market our lifts.

SAVE TIME & SPACE

Cibes platform lift solutions can be installed in places where conventional lifts cannot. Our platform lifts are very space-efficient and have minimal impact on the surrounding building, thanks to the low pit and headroom and the integrated machine room. You do not even have to construct a lift shaft, we deliver it for you!

FOR LARGE & HEAVY LOADS

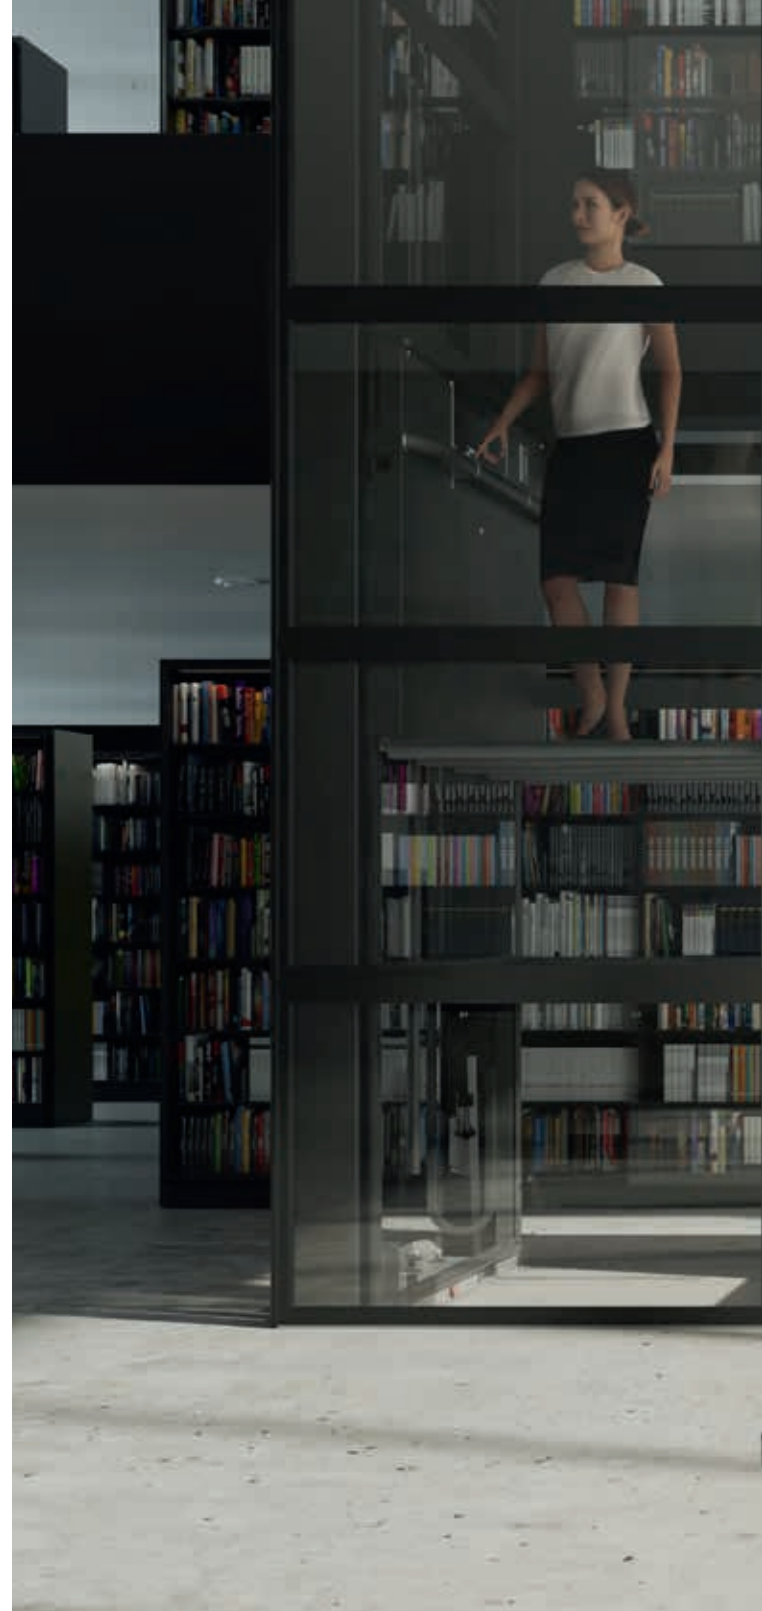

Cibes large 1000 kg platform lifts are certified to transport both passengers and goods. The large platform and extra-wide doors make the 1000 kg platform lift an ideal lift solution for warehouses, office buildings, care homes and clinics.

SILENCE MADE IN SWEDEN

We care about your need for serenity and we care about the planet. This inspired us to develop the EcoSilent drive system and the result is a quiet revolution for screw-driven lifts and for contemporary architecture. The EcoSilent system not only makes our 300-500 kg platform lifts virtually soundless, it also reduces their energy consumption by nearly 50 %.

Silent operation

Inside the lift, the sound level is 55 dB equivalent to the sound of a moderate rainfall. Outside the lift, the sound level is 40 dB, which can be compared to the sound of a modern fridge.

Decibels measured 2 m from the lift, at constant speed and with a 150 kg load. All tests conducted by Springwell Audio AB, member of the Swedish Acoustical Society, www.springwellaudio.se.

Energy-efficient drive

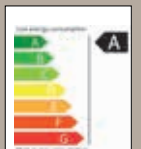

Cibes EcoSilent drive system carries Energy Label A and only uses an estimated 215 kWh per year, which is less than a modern washing machine. A lift equipped with EcoSilent will consume about 45% less than a lift without. A great investment.

Energy-efficient lift

A lift equipped with our innovative drive system carries Energy Label A and uses 45 % less energy than a lift without.

Yearly energy consumption based on a 2 stop lift with 3.6 m travel, equipped with EcoSilent and a frequency of use of 20 travels/day. Energy classification according to VDI 4707 Part 1: 2009. Tests conducted by Liftinstituut B.V. www.liftinstituut.com.

ADAPTABLE & SMART LIFT CONCEPT

Cibes platform lifts are delivered in ready-made modules with everything you need for installation, including the lift shaft. To personalise your lift, Cibes provides you with a great choice of different door models, colours and accessories.

Smart & space-saving accessibility

No machinery on top, low headroom.
Energy-saving LED lit ceiling.

Shaft panels in steel or in safety glass.
All four sides can be glazed.

Wide choice of door models; steel doors, aluminium doors, gates, EI60 fire rated doors.

Concealed or externally fitted power door openers as an option.

The Cibes A5000 is designed to have a small footprint and a maximum of space inside.

OUTDOOR LIFT SOLUTION

Our weather resistant outdoor lifts offer comfortable access to all floors, create a seamless flow between your indoor and outdoor areas and preserve the space inside. Visit www.cibeslift.com to download our outdoor lift brochure and learn more about our outdoor lift concept.

ADAPTABLE & SMART LIFT CONCEPT

Cibes cabin lifts are delivered in ready-made modules with everything you need for installation. To customise your lift, Cibes offers you a wide range of cabin designs, door models, colours and accessories.

ELEGANT & COMFORTABLE ACCESSIBILITY

Reduced top height

The 2500 mm top height fits easily under most ceilings.

Machine room less

The machinery fits inside the shaft, no need for a separate machine room.

Screw-driven system

Reliable 100% electric screw-driven system, no hydraulics.

Energy-saving LED technology

The ceiling is illuminated by durable and energy-saving LED lights.

Automatic telescopic doors

Automatic telescopic doors for landings and cabin.

Space-saving doors

The doors slide open without obstructing the space on the landings.

One touch operation

One touch operation at landings and inside the cabin.

Reduced lift pit

At the bottom floor, a shallow pit of 100 mm is enough.

OPTIONS FOR YOUR COMFORT

We offer several elegant mirror designs for your cabin lift. Mirrors can be a great visual aid for wheelchair users when they need to turn or exit the lift.

CONTROL PANEL OPTIONS

With touchscreen or in steel with push buttons

Touchscreen controls are not suitable for projects required to meet European Accessibility Standard EN 81-70.

ACCESSIBILITY OPTIONS

To meet with different accessibility standards, the Cibes C1 Pure cabin lift is available with a range of accessories and options with an ergonomic and user-friendly design.

Ceiling with LED spotlights •

120 LUX

Multi-functional integrated speaker •

Speaker for emergency phone, voice announcement and arrival signal.

Level indicator with 3" display •

Wall mounted mirror •

Elegant stainless steel panel •

Horizontal control panel •

Ergonomic control panel, compliant with EN 81-70.

Ergonomic handrails •

2 sturdy handrails in black anodized aluminium.

Double horizontal control panels

Ergonomic call buttons

Doors are equipped with 50x50 mm tactile push buttons with back light, compliant with EN 81-70.

- Call buttons with one touch operation.
- Face plate available in any RAL or premium colour as an option.

Horizontal control panel in stainless steel

Inclined control panel with 50x50 mm tactile push buttons equipped with back light and Braille, compliant with EN 81-70. Available for all cabin sizes except the 900x950 mm.

- Destination buttons with one touch operation.
- The alarm button activates the alarm signal and emergency telephone.
- The door opening button makes it easy to re-open the door.

DESIGN WITH MIRRORS

A mirror wall creates a sensation of space inside the cabin, while smaller mirrors can serve as a great visual aid when you enter and exit the lift.

The Cibes C1 Pure offers you several stylish mirror alternatives to suit your preference and needs.

STEP BY STEP ALL THE WAY THROUGH YOUR PROJECT

THE 1-2-3 SYSTEM:

Step 1: Your certified Cibes dealer provides personal advice for your specific situation.

Step 2: Fast delivery and installation by your Cibes dealer.

Step 3: Service provided by your Cibes dealer.

QUALITY INSTALLATION

Your Cibes dealer can visit the installation site in order to find the best lift solution for you. The lift is custom-made, so you can rest assured that it will fit.

In most cases, the lift installation requires no major structural alterations to the building and takes just a few days to complete.

SERVICE

Our screw-driven technology is simple and robust to reduce the need for maintenance. Nevertheless, it is important to keep your lift in good order. Therefore, we always recommend that you sign a service contract with your Cibes dealer.

Get in touch with us!
sales@cibesliftgroup.com

DAY 1 – INSTALLATION

First day – The bottom frame, guides and platform are installed. Your platform lift can be installed with or without a lift pit.

DAY 2 – INSTALLATION

Second day – The doors, shaft and platform cladding are installed, all electronics are plug & play and easy to connect.

DAY 3 – INSTALLATION

Third day – The finishing touches are applied and all functions of the lift are tested. Your lift is now ready to use.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European Safety Standard Machinery Directive 2006/42/EC. The brand Cibes Lift is owned by Cibes Lift Group AB ©. For more product details and information about the product and accessory selection, contact Cibes Lift Group AB. This product information is general and we reserve the right to modify product design and specifications. Minor deviations in colour reproduction can occur. © CIBES LIFT GROUP AB.
